

H101A / HE01

Motorized microscope stages for upright microscopes

The ProScan H101A and HE01 are motorized XY stages for upright microscopes and are fully customizable. Their compact design makes them ideal for integration into OEM devices or customized microscopes.

Both stages have a 2 mm ballscrew and 200-step motor for a balance of velocity and resolution, offering sub-micron repeatability while also providing speeds of up to 60 mm/s. The HE01 also uses 0.1 μ m linear encoders to provide enhanced long-range repeatability.

Prior's patented Intelligent Scanning Technology (IST) optimizes the stages' accuracy and linearity.

The H101A and HE01 accommodate a variety of specimen types including glass slides, multiwell plates, semiconductor wafers, and metallurgical samples.

Key Features

- Compatible with most brands of upright microscopes and fully customizable for use in OEM projects.
- Quiet and reliable.
- Wide range of sample holders.
- Intelligent Scanning Technology™ (US Patent 7,330,307).

Applications

- Confocal and super-resolution microscopy
- Metrology
- Slide scanning
